Beautiful sun shading even for larger spaces

You should enjoy your great summer's day on the patio without any worries. Plaza Viva provides the necessary shade so you can do just that. And in fact over **up to 30 m²**, for the whole family including friends. But Plaza Viva isn't just practical. It adapts to any house facade with its **modern, slimline design**. And the **huge selection of attractive awning fabrics** gives you the option of designing your outdoor space to your own personal taste.

Would you like to enjoy the open air? Then simply open your Plaza Viva to exactly the position you desire at the press of a button.

Our tip: With the Plaza Viva **OptiStretch** version, the fabric is always held captive and the edges of the cover are prevented from billowing in winds.

Extremely stable even in windy weather

Yes, a little summer breeze is lovely. Especially if the awning remains stable despite strong gusts. Just like Plaza Viva. Thanks to the two front posts it is **extremely wind-resistant**. The stable structure guarantees that the pergola awning can remain extended **up to wind force 6** (Beaufort) and then also offers reliable sun protection too. Even with facades with not many load bearing substrates, like old buildings for example, the posts withstand strong wind loads consistently.

the awning simply

OptiStretch or Stretch – always a stable fabric position
With Plaza Viva OptiStretch the fabric is held captive and on all four sides. The advantages: a highly tensioned fabric and no light gap on the sides. The basic version of the Plaza Viva Stretch is tensioned on two sides and there is a light gap between the fabric and guide channel. A strong rope tensioning system ensures even fabric positioning with both versions.

Clever rain protection no need to leave your favourite spot

With Plaza Viva you remain dry as the rain water reliably drains off. Our recipe for success: the adjustable telescopic post and the water-repellent awning fabric (more about our fabrics on page 10). You can remain seated in your favourite chair or enjoy a family meal totally relaxed and **enjoying being outdoors in the rain.**

New: telescopic post for rain drainage

A minimum awning pitch is required to ensure that rainwater drains off reliably. However, it is not always possible to produce this during installation. The optional telescopic post helps here. You can lower it **using a gear handle** to achieve the required pitch in the rain.

Really flexible

When lowering the top part of the post using the gear handle, the load on the construction is reduced and it remains inherently stable. This is possible thanks **to the wall bracket with floating bearing and compensation joint on the upper part of the post.** Both guarantee that the pitch of the entire awning is ideally adjusted.

Figure 1: The wall bracket with floating bearing reduces the load on the whole construction when the telescopic post lowers the awning.

Figure 2: Thanks to the compensation joint on the post the awning construction can adjust flexibly to the new pitch.

Best quality, maximum comfort down to every last detail

Premium quality
made in Germany

Anyone opting for weinor products can rely on top quality. Only high-quality materials are used.

This also applies to Plaza Viva. It sets standards with numerous technical highlights.

Well protected

The all-round enclosed and robust **awning cassette** keeps the fabric and other component parts well protected from the elements. You can enjoy superb weather protection for many years.

Wonderful in design and aesthetics

Plaza Viva is designed so that almost no fixings are visible. As a result, the **awning design** looks slimline, modern and elegant. Turn your outdoor space into a hidden gem with Plaza Viva!

Quiet and consistent operation

The Plaza Viva **tension system** ensures optimum fabric performance and positioning. It includes, amongst other things, a new flat rope and the tried and tested weinor carriage system. The flat rope is **extremely quiet and durable**, the weinor carriage system features **quiet retraction and extension that is gentle on materials**.

9.30 p.m.

Children in bed ... a glass of wine on the patio.

"We can sit on our patio well into the night enjoying a cosy atmosphere."

Light and warmth – for ultimate comfort thanks to LEDs and a heating system

Your options for great comfort: enjoy evenings on the patio under warm white **LED spotlights** that can be dimmed infinitely.

You can even enjoy your patio at cooler times with the **Tempura heating system**. It can be retrofitted and is unobtrusively attached to the house facade.

Hand transmitter with display BiEasy 15M and BiEasy app

Alternatively, you can also operate every technical element on your patio using io-homecontrol® from **somfy**.

Convenient control by hand transmitter, sensor or app

Plaza Viva is fitted as standard with a drive without remote receiver. If you choose an awning with remote-controlled motor and **weinor BiConnect radio control**, you can really easily operate the sun protection, lighting and heating using the hand transmitter or BiEasy app. The sun sensor makes the awning extend automatically – regardless of whether you are at home or not.

Feel-good atmosphere thanks to perfect fabrics

Exclusive fabric quality

Choose your totally personal pattern from **more than 150 fabric versions!** Whether it's plain or stripes, modern earth colours or bright sunny shades: you will find the right fabric to suit all tastes at weinor. And the innovative solution dyeing technology guarantees long-lasting colour brilliance.

Perfect fabric protection

Teflon woven tissue protection and nanotechnology provide impregnation for the weinor awning fabric. The **dirt-resistant protective coating** also prevents soiling.

colours
by weinor®

The latest frame colours

At weinor you can select from more than **50 standard colours** and more than **150 other RAL colours**. The powder coating done in our in-house factory guarantees colour fastness and a uniform gloss level.

Additional attractive privacy and sun protection from the front

The **Valance Plus** from weinor is the perfect solution for dazzling light, especially when the sun is lying low in the evening. It can be lowered using the gear handle and then also offers reliable privacy protection. The Valance Plus is also available with the fabrics from the screens by weinor® collection that let light and air through.

Plaza Viva technical data

Max. width	6 m
Max. projection	5 m
Multi-unit systems	optional
Wind protection:	tested to wind force 6 (Beaufort)
Rain protection*	from a 4° pitch
Roof pitch	4° - 25°
Mounting alternative	installation on walls, ceilings and roofs possible
Motor drive	as standard

* The water draining effect using the telescopic technology is only achieved with a minimum awning pitch of 4 and when the telescopic post is completely lowered (exception: Valance Plus option. The minimum pitch required here is 5°).

The ideal complement to your Plaza Viva

Paravento – the stylish side screen

Paravento shelters you from curious onlookers, sunlight and fresh side winds. As a cost-effective solution, the slim-line, robust cassette can be mounted practically anywhere. The Paravento creates attractive highlights in combination with a state-of-the-art pattern from the weinor fabric collection.

VertiTex – the ultimate in vertical sun protection

With an externally fitted vertical awning from the VertiTex range, weinor offers a perfect solution for sun protection, glare protection, wind protection and privacy protection all rolled into one. The fabric and technology are both housed in one miniature cassette but are still capable of shading large areas. The red dot award-winning VertiTex is available in different versions, colours and fabric qualities.
